and Heat Pumps**

Gas Boiler Systems

Clothes Washers

Kitchens

Gas Water Heating

Lighting Systems

**Data Centers
and Servers**

Industrial

**Strategic Energy
Management**

Premium Efficiency Motors

Motor Systems

Distribution Transformers

Municipal Water and
Wastewater

Audience Discussion

Tools Or Challenges?

“The more connectivity that exists, the better a business can run. Whether it is ensuring product quality, operating efficiency or sustainability, the more devices connected, the more information you have. And the more powerful the tools you have to use that information, the more value that can be returned to a business' stakeholders.”
